

HB 1830 -- Student Transfers

Sponsor: Stream

Currently, a student who resides in an unaccredited district may attend a public school in the same or an adjoining county. This bill makes an exception for any unaccredited district governed by a special administrative board for the first two full school years after the board is appointed and for as long after that as the district demonstrates improvement, as defined in the bill, in its annual performance report under the Missouri School Improvement Program or its equivalent successor program. The bill also allows a student in an unaccredited district governed by a special administrative board to transfer to a different school within the district that has met or exceeded state performance targets for the previous academic year, if the school has adequate space as determined by the board.

The bill contains an emergency clause.
